Main Project

• Chema Crowdfunding website

A community-driven crowdfunding platform that enables individuals and organizations to create fundraising campaigns, receive donations, and manage withdrawals.

• VR Venue Simulation Tool for Event Setup

My final-year Computer Science project a web-based venue layout and visualization platform that helps users create, edit, and visualize static 2D venue layouts and transform them into interactive 3D formats for events, conferences, weddings, and other spaces.

Experience

FullStack Web Developer 2025 - Present

Muzukuru Funeral Streaming | Harare | Zimbabwe

Develop and maintain full-stack web applications, APIs, and database integrations while collaborating with stakeholders to deliver scalable, reliable, and user-focused software solutions.

Software Engineering Intern 2024 - 2025

Muzukuru Funeral Streaming | Harare | Zimbabwe

Worked across frontend development and technical operations, contributing to web applications, system testing, and live event streaming. Led frontend development for the Muzukuru Management System while providing networking and technical support for livestreamed events.

Education

• Bachelors in Computer Science - 2.1

University of Zimbabwe

2022 - 2026

Certification

- Meta Frontend Developer Professional Certificate
- Meta Backend Developer Professional Certificate(Inprogress)
- Python Essentials 2
- Introduction to Design thinking

Language

- English
- Shona

Skills

- Systematic Thinking
- Problem Solving
- Python
- Typescript
- Javascript
- Next.js
- React.js
- Jest
